
THE FLIGHT CREW PRODUCTION RIDER

Sound Specifications

Artist travels regionally with floor wedge monitors, audio console/mixer, microphones, stands, and cables. In the event this is a fly date, please refer to the Backline and Hospitality riders. Note: sound company is responsible for advancing, load in logistics, power and accessibility, as system requires. If there are problems which make you unable to fulfil Artist's requirements, please contact Tim Perkins at 920-737-7612.

Speaker System

House sound system must be of professional quality and be sufficient in size and power handling to provide even and total coverage to 100% of sold seating. The system must provide full range coverage from 40hz to 16khz and be able to deliver dynamic peaks to 120 decibels. The system must include front fill cabinets for center fill with separate EQ and Level control. The system must also include subwoofer cabinets that can operate from an Aux send.

Mixing Console

Soundcraft, Allen & Heath, and Midas are the preferred consoles. This console is for Flight Crew only and will not be shared with the support act, unless approved in advance by Tim Perkins.

Monitor System

7 on stage monitors and 1 drum fill is required. A total of 8 mixes, 6 quad boxes for stage.

Stage Risers

Three 8' x 8' risers for drums, keyboards, and strings/percussion are required.

Lighting

Upstage and downstage lighting/backdrop trussing is required. At least 30' wide x 12' High. Upstage truss requires at least 8 LED fixtures and 4 moving heads. Downstage truss requires at least 8 LED fixtures, 2 leko (ellipsoidal) lights, plus crowd blinders. A lighting controller is required. The preferred controller is the ChamSys QuickQ 10. The artist will provide a 30' wide x 12' high black backdrop with logo.
